

Kevin Milligan

My name is Kevin Milligan, I have been a Safety Advisor with the Motor Safety Association of Saskatchewan (MSA) since 2013.

Prior to coming to work with MSA, I was a Safety Advisor in the Mining industry working for BHP Billiton on the Jansen Potash Mine near Lanigan, Saskatchewan. I was hired as a Safety Advisor to oversee the Freeze Well Drilling on both the Service and Production Shafts due to my extensive safe drilling experience in the Oil & Gas Industry.

I am married to my beautiful partner Patti and we have two daughters, four Grandchildren, one Grand-pug and one Grand-boxer/pug. We spend our weekends out at our cottage on Last Mountain Lake fishing, tubing, floating, playing games and enjoying time around the campfire with family and friends.

We also love to camp and make annual trips to northern Saskatchewan in the late summer months to explore the boreal forests and hidden lakes. Patti and I also love to travel and we so look forward to being able to safely roam freely once again with friends to warmer destinations.

Working for MSA has been the most rewarding job I have ever had as I get to work with a variety of different organizations, demonstrating ways of providing a safer workplace for their employees.

I get to come to work every day and work with an amazing team of professionals who enjoy working together to find solutions to improve the lives of one another as well as the members we serve.
